Technical founder and product builder with **15+ years** shipping SaaS, AI products, product analytics, payments, commerce portals, marketplaces, mobile apps, internal tools, and agentic workflows. Founded, built, and sold **Quickstaff**; led **Buffer's** freemium growth product for **150k+ MAUs**; architected warranty commerce platforms supporting **\$5M+** in annual revenue; now ships AI-native production tools across Salesforce, web, Convex, Cloudflare, PostHog, and modern agent-assisted workflows. Strongest in autonomous, small-team environments where the work is ambiguous, the users are real, and the fastest path to learning is to build, measure, iterate, and ship again.

Technical Profile

§ 01

FRONTEND / WEB	React, TypeScript, JavaScript, TanStack Start, Vite, Tailwind CSS, Vue, Quasar, HTML, CSS
BACKEND / PLATFORMS	Convex, Cloudflare Workers, Salesforce, Visualforce, Apex, Laravel, Python, PHP
AI / AGENTS	OpenAI, Anthropic, Claude Code, Cursor, Hermes, AI agents, prompt engineering, guardrails
ANALYTICS / GROWTH	PostHog, Mixpanel, Google Analytics, SQL, funnels, activation, retention, A/B testing, event tracking, product messaging
COMMERCE / PAYMENTS	Stripe, Braintree, subscriptions, billing, invoicing, VAT, checkout flows, pricing migration
PRODUCT SURFACES	SaaS, marketplaces, developer-facing products, customer portals, internal tools, dashboards, mobile apps, AI chatbots, onboarding

Selected Impact

§ 02

- Founded, built, scaled, and **sold** Quickstaff — a bootstrapped B2B SaaS marketplace.
- Led Buffer freemium growth for **150k+ MAUs**; activation **+11%**, MAUs **+5%**.
- Migrated **16% of \$1.5M MRR** to new pricing via self-serve flows; saved **\$2M** in back-dated VAT exposure.
- Grew The Overflow from 0 to **180,000 users** with no paid marketing; cut internal catalog ops **80%+**.

Experience

§ 03

AI Founder in Residence / Product Builder at Ensurrall · Guarantee VC

Toronto · 2024–Present

- Ship AI-native internal tools, Salesforce interfaces, customer portals, automation workflows, and web apps across an insurance and warranty business.
- Replaced work previously handled by a distributed eng team — AI-assisted development, product judgment, Salesforce depth, and rapid prototyping to deliver directly.
- Designed and shipped AI chatbot workflows, claims tools, internal dashboards, Salesforce-backed interfaces, and operational automations.

Founder & AI Product Builder at Already Loved

Remote · 2024–Present

- Building an AI-personalized children's book platform that turns child-specific inputs into custom illustrated books.
- Use **PostHog** for funnels, onboarding performance, and drop-off across the book creation flow; shipped private beta and generated first revenue.

Founder, Product Builder & Front-End Engineer at Quickstaff

Toronto · 2015–2022

- Founded, built, scaled, and **sold** a bootstrapped B2B SaaS staff scheduling marketplace connecting employers with event staff.
- Implemented the front-end with **Vue, Quasar, Laravel, JavaScript**; owned UX, commits, deployments, QA, billing, and release prioritization.
- **4.7-star Capterra rating** and **93% recommendation rate** through practical, user-centered execution.

Growth Product Manager / Freemium at Buffer

Remote · 2022–2023

- Led a remote EPD team owning Buffer's freemium experience for **150k+ MAUs**: onboarding, activation, upgrade paths, billing, payment flows, and product messaging.
- Improved activation **+11%** and contributed to a **+5%** MAU increase through onboarding experimentation and product-led growth.
- Built self-serve pricing migration flows that moved **16% of \$1.5M MRR** to new plans.
- Introduced VAT collection at checkout, saving **\$2M** in back-dated remittances without negatively impacting conversion.
- Used Mixpanel, SQL, customer feedback, and experiment analysis to prioritize roadmap; owned product messaging via product triggers.

Product Architect & Builder at VCG Group · Ensurrall

Toronto · 2010–2022

- Architected B2B dealership and B2C consumer warranty commerce portals supporting **\$5M+ in annual revenue**.
- Built self-serve workflows for warranty quotes, purchases, policies, customer records, claims management, and reporting.
- Designed Salesforce-backed systems using **Visualforce, Apex, JavaScript, Salesforce CRM** and custom portal workflows.

Lead Product Manager / Product Builder at The Overflow

Toronto · 2013–2019

- Built and launched a genre-specific music streaming service across **iOS, Android, web, Python, and PHP**-backed systems; grew 0 → **180,000 users** with no paid marketing.
- Designed catalog management workflows that cut internal music ops time by **80%+**.

Selected Products

§ 04

Already Loved shipping · [alreadylovedkids.com](#)*AI-personalized children's book platform.*TanStack Start · React · TypeScript · Convex ·
Cloudflare · PostHog · Stripe · fal.ai · ElevenLabs
